

## Mac installation walk through:

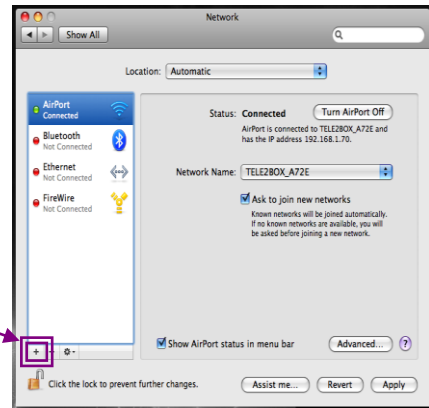

Once you have subscribed at [www.iportal.me](http://www.iportal.me) and received your confirmation email, open your System Preferences dialogue and proceed as follows:

Click on the System Preferences option. You should see a dialogue box like this.

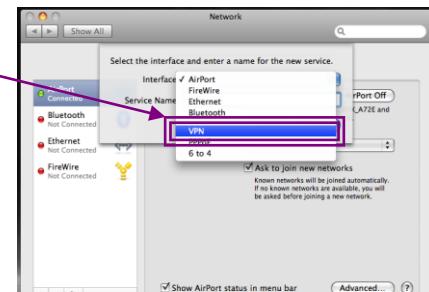

Then select the **Network** icon.

Next, click the + button to create a new network connection.

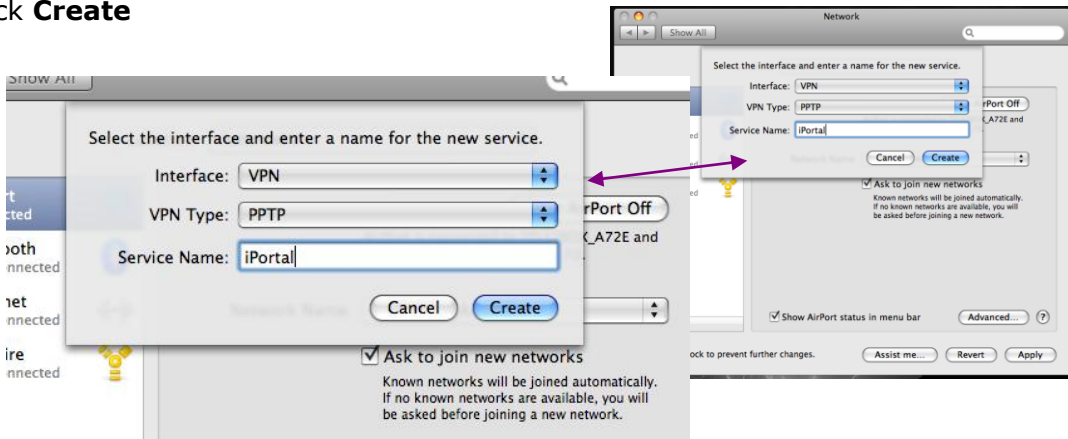

Then on the interface selection choose a **VPN** (Virtual Private Network) connection from the drop down list.

Choose the following options:  
 Interface – **VPN**  
 VPN Type – **PPTP**  
 Service name – **iPortal**  
 (you have to type the last bit in!)

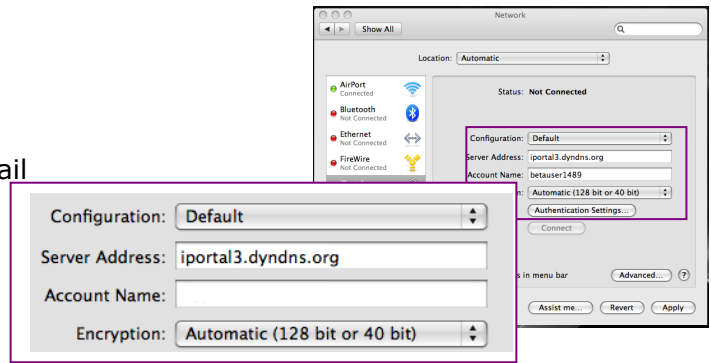

Then click **Create**

Now you need to type in the server address:

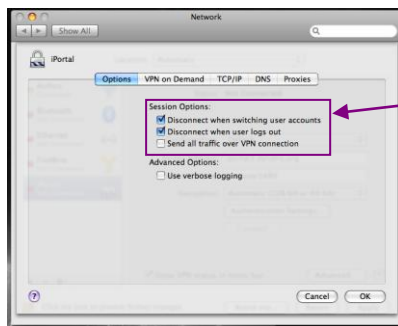

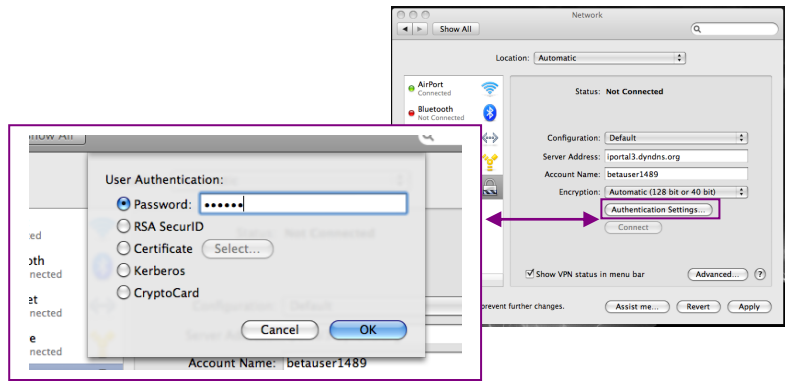

**iportal3.dyndns.org**

and the '**Account Name**' is the email address that you subscribed with.

You're nearly there. Click **Authentication Settings** and enter the password which was emailed to you.

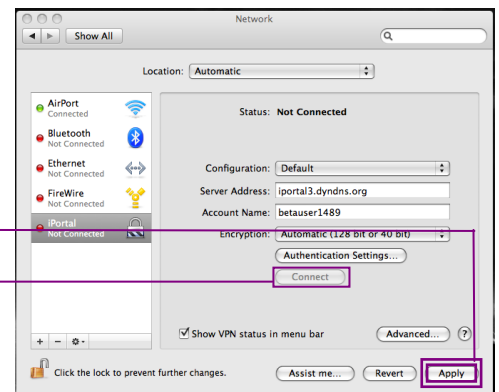

Then click **OK**

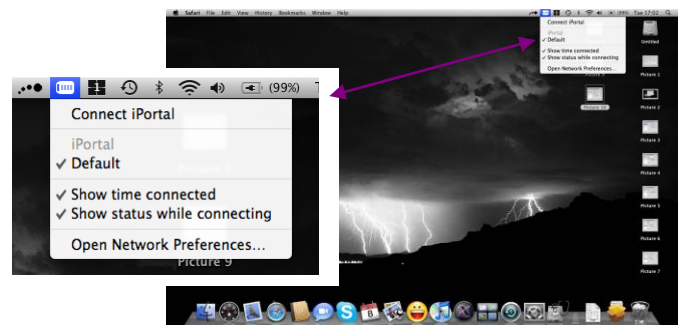

Finally! Click **Advanced**, then tick the box for 'Send all traffic over VPN connection' and **OK** that.

It's done! Click **Apply**

Then **Connect** and we should be in business.

Whenever you want to watch TV click 'Connect iPortal' and you're ready to watch TV, disconnect when you're done.

Open Safari now and type in [www.bbc.co.uk/iplayer](http://www.bbc.co.uk/iplayer) or [www.itv.co.uk/ITVplayer](http://www.itv.co.uk/ITVplayer) or [www.e4.com](http://www.e4.com) or <http://demand5.tv> and start watching UK television!

Remember, we're here to help if you get stuck so don't struggle, email us at [support@iportal.me](mailto:support@iportal.me) or read our FAQ's.
